REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The closest prior art Appelberg et al (Infect. Immun. Feb. 2000. 68(2): 912-914) does not suggest deleting both actA and inlB in the context of retaining inlA. Appelberg et al. does not delete inlB in isolation; Appelberg et al. deletes the entire inlA/B operon. Thus, while one of skill in the art might arguably have been motivated from the Appelberg et al. to produce a mutant deficient in both actA and inlA/B (a point Applicants do not concede), one would not have been motivated to produce a mutant deficient in actA and inlB while leaving inlA intact. The specification has shown unexpected results through the retention of the inlA gene. Further, the obviousness-type double patenting rejection as being unpatentable over claims 1-66, 69-72, 74-76, 88-93, 102-109, 11-116, 118-128 of copending Application No. 10/883,599 has been withdrawn. The amendment of the co-pending claims has obviated this rejection. The amendment of the present claims and the co-pending claims in 10/773,792 has also obviated the former obviousness-type double patenting rejection against said claims of that application.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
